ACCESS CONTROL CAPABILITIES

What Livvie Does at the Gate.

Livvie is more than a gate system.

It's an access control layer built into your daily operations—designed to reduce manual work, improve security, and eliminate bottlenecks at staffed and unstaffed entrances.

With Livvie, communities can:

- ✓ Register guests digitally via the resident app
- ✓ Capture guest name, visit duration, and notes automatically.
- ✓ Sync approved access directly to the gatehouse or guard interface
- ✓ Integrate with LPR cameras, transponders, QR codes, and pedestrian access systems.
- ✓ Log every entry for visibility, audits, and incident review

All without forcing staff or residents to learn yet another system.

Why Managers & Boards Care

- ✓ Fewer gate interruptions and phone calls
- ✓ Less manual data entry and fewer errors
- ✓ Clear visibility into who accessed the property—and why
- ✓ Reduced liability through consistent verification
- ✓ Scales across high-rises, HOAs, and gated communities
